About Me

Software Engineer and Researcher specialized in Cloud Architectures, distributed systems, and Artificial Intelligence (LLMs/RAG). Over the last +4 years, I have designed multi-cloud serverless platforms and cost-optimized AI engines. I combine scientific rigor with product engineering: leading technical teams, contributing to global Open Source projects (Ollama, Gemini), and scaling my own production-ready SaaS platforms.

Create and develop the tools of the future

Experience

Founder & Lead Full-Stack Engineer

Klipso (SaaS)
Feb. 2025 - Present

- Architected a full-stack AI SaaS that autonomously edits YouTube videos into viral shorts.
- Built an event-driven serverless pipeline orchestrating cloud GPUs, Whisper, Gemini, and MediaPipe.
- Scaled to 50+ recurring users and 2,500+ generated clips, integrating Firebase and Stripe.

Cloud & AI Researcher / Tech Lead

Cloudlab (URV)
Aug. 2023 - Present

- AGNS (Zero-LLM GraphRAG): Designed a graph search framework, reducing operational costs by 99.9% with O(1) latency (EMNLP 2026).
- PyRun Cloud (PaaS): Led an AI-assisted platform automating AWS/IBM cloud deployments, cutting setup time by 80% for 50+ active researchers.
- Lithops: Engineered serverless engines for supercomputers (MareNostrum 5) and K8s, improving cold-starts by 7x (IEEE 2024).

Software Engineer

Generalitat de Catalunya
May. 2022 - Jul. 2023

- Developed "Soundless", a Kotlin Android & Fitbit platform to measure urban noise health impacts.
- Built a GCP/BigQuery backend using Z-score algorithms for real-time telemetry processing (IEEE 2025).

Open Source & Conferences

Core Contributor

International Speaker

- Low-level runtime optimizations for Ollama; tool orchestration layer improvements in Google's Gemini CLI; and backend architecture for Dask CloudProvider.
- Selected for PyConEs 2025 (Sevilla: "Multi-Cloud Serverless Programming") and EuroScipy 2025 (Poland: "Cloud-Optimized Data Processing").

Education

2026 Master in Artificial Intelligence and Cybersecurity
Universitat Rovira i Virgili

2023 Bachelor's Degree in Software Engineering
Universitat Rovira i Virgili

Skills & Technologies

Cloud & Infrastructure

AWS, GCP, IBM Cloud, Kubernetes, Docker, Serverless, Git, CI/CD

AI & Machine Learning

RAG, LLMs (Gemini, Ollama, Whisper), PyTorch, TensorFlow

Languages

Python, TypeScript, React, Java, Kotlin, Swift, Go

Databases

Firebase, BigQuery, DynamoDB
